
DIGITAL TEACHING AND LEARNING SERIES

Module A: Fundamentals of Digital Teaching and Learning

Course Overview

The “Fundamentals of Digital Teaching and Learning” course is the first of three courses in Blackboard’s Digital Teaching and Learning series. This course provides participants with the competencies required for teaching in a blended learning or e-learning environment. The course is delivered through a series of modules that are assessed and certified by Blackboard in co-operation with its training partners. Participants will be assessed and, if successful, certified by Blackboard.

Course Modules

Day 1

- What We Know About Learning
- Introduction to Digital Teaching
- Digital Teaching Approaches and the LMS

Day 2

- Designing E-learning Content
- Developing E-learning Content

Day 3

- Principles of Learner Assessment and Feedback
- Introduction to E-learning Assessments

Day 4

- Collaborative E-learning
- Web and Video Conferencing Fundamentals

Day 5

- Support and Success of the Online Learner
- Evaluation and Reflection

Course Materials and Requirements

You will be provided with a comprehensive workbook that will enable you to develop the competencies you need to become a Blackboard accredited Associate in Digital Teaching and Learning.

Who Should Attend

This course is designed for individuals working in, or intending to work in, an organization that provides blended or e-learning.

Duration

Each course is five days in length.

Important Information

Direct questions to AskUs@blackboard.com or your Blackboard Account Representative. Participants will be issued a username and password for this course in order to access the Blackboard Learning Management System and participate in activities during the session.
